01OCT21 Vol. 2022 No. 10

Planning to Return to LIVE Events in January 2023

Continuing 2021-22 Events

As Summer ends and we enter Fall 2021 we have mixed feelings on Covid19. Many technical and professional societies, many corporate retreat planners, many others are still struggling to see who will be willing to travel to a non-essential meeting. Perversely, many venues hope to pass the entire cost of past-year losses to those desperate enough to meet now. We do not want to even chance to endanger you, nor do we believe you desire to pay a 30% to 50% premium for rooms and food and beverage, and with little right to cancel should conditions worsen. We planner schedulers are all about always having options. We have therefore pivoted to a 100% virtual and 100% free* “event” for our Attendees. (*We may have nominal charges for some optional programs, and we hope [our sponsors](#) will continue to support our endeavors.)

Therefore [Construction CPM Conference 2022 is launched NOW!](#)

Visit our Program “at-a-glance” website. We are posting new material daily as abstracts are submitted and vetted, and presentations recorded and uploaded. You may access content at http://www.constructioncpm.com/At-A-Glance/at_a_glance2022.htm on your own schedule as convenient to YOU. Once we reach a critical mass, we will plan for several days of Zoom-style Q&A with the Speakers (powered by our Diamond Sponsor Drexel University.) Who knows? Maybe conditions will improve so that we can host one or more LIVE regional meetings to socialize with Speakers and each other. It’s an adventure!

For those who attend a conference to obtain continuing education credit, we also have you covered in our Construction CPM Conference way of providing more for less. Authors and Presenters of content are asked to provide three Challenge Questions which “prove” Attendee are indeed viewing the presentation. These may be technical in nature but often are simply showing “being awake” by queries about the Presenter’s favorite color or other non-technical comment made. Properly answering the Questions generates a Certificate and email which may be used by PMI, ASCE, and most model states for PE Professional Engineering license PDH. The cost is usually \$5 per PDH and is donated to the Philadelphia Chapter of the Pennsylvania Society of Professional Engineers. Go to <http://pspe-philly.org/MCECourses/BuyNow-1.htm> for new and old lectures by the like of Jim Zack, Chris Carson, Glen Palmer, David Long, Saleh Mubarak and others. Presenters also may usually claim double credit.

Be well – get vaccinated and yet maintain safe conducts – enjoy life.
